

Stereolithography (SLA)

Our stereolithography service is fast and flexible, and offers a choice of 3 different resins.

With 18 ARRK SLA machines at our disposal, we are typically able to deliver part within three or five days from acceptance of CAD-data.

Available Materials:

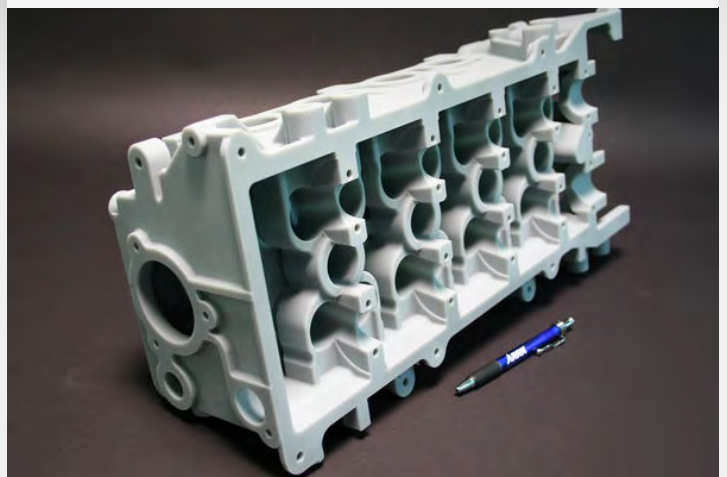

- **Clearvue**
 - Clear optical material
- **Accura 25**
 - White colour
 - Multi-functional material
- **Accura Extreme**
 - Grey colour
 - Extreme durability

Typical Tolerances:

± 0.15 per 100 mm

Realistic finished prototypes:

Our in house finishing teams offer customers a range of surface finishes along with a paint and texturing service, so that your prototypes looks as real as possible.
